

NYA-EVO[®]
GO FURTHER

ADVENTURE PHOTOGRAPHY
BACKPACKS DESIGNED AND
TESTED IN THE NORDICS

Adaptable adventure backpack for photographers, filmmakers and explorers everywhere.

NYA-EVO brings a new breed of adventure backpack to the camera equipment market.

One thing all filmmakers and photographers can attest to is that gear is heavy, expensive and bulky. Bags need to be sturdy enough to withstand extreme situations, and that is where NYA-EVO comes in.

Our backpacks have already helped some of the world's most talented explorers take their craft even further.

ECONYL®

ENDLESS POSSIBILITIES

NYA-EVO'S PARTNERSHIP WITH ECONYL® MEANS A POSITIVE FIRST STEP TOWARDS SUSTAINABILITY

Since the founding of NYA-EVO making products more sustainable has been on the top of their to-do list since day one. Selling products in a space that asks so much from nature it is only fair that NYA-EVO as a company does their utmost best to support nature back, this is their first step. After strenuous tests NYA-EVO can finally say that their most popular Fjord 36 and Fjord 60-C backpack's main fabrics are now made with a sustainable ECONYL® fabric are ready for market.

BREAK YOUR LIMITS NOT THE PLANET

Transforming nylon waste, otherwise polluting the Earth, into ECONYL® – a regenerated nylon. It reduces the global warming impact of nylon by up to 90% compared with the material from oil.

1. RESCUE

Rescue waste otherwise polluting the earth, like fishing nets, fabric scraps.

2. REGENERATE

Through a radical regeneration and purification process, the nylon waste is recycled right back to its original purity.

3. REMAKE

ECONYL® regenerated nylon is processed into yarns.

4. REIMAGINE

....., and finally into NYA-EVO'S ripstop fabric and NYA-EVO backpack.

**NYA-EVO BELIEVES IN GOING FURTHER
FOR THE SHOT AND THE PLANET**

ADVENTURE PHOTOGRAPHY

- Large back panel access
- Removable Camera Insert system (RCI)

FJORD 36 ECONYL®

Peace of mind

Keeps your camera equipment safe from the elements.

Comfort

Aluminium frame and ergonomically designed shoulder straps make you feel the load inside the backpack much less, carrying 15kg with ease. Back padding body contact fabric is quick drying, soft and non-abrasive. There is also the option to remove the waist belt when not needed.

Stability

Our load stabilizer system moves weight to the frame and the frame transfers it to the hips.

Not worrying about your gear means that you can focus on what's important, experiencing life.

FJORD 36 ECONYL®

THE ULTIMATE EVERYDAY ADVENTURE CAMERA BACKPACK

With a full-size aluminum frame, highly water-resistant and durable materials, the rugged NYA-EVO Fjord 36 all-rounder pack is up for any adventure. Featuring an updated main fabric made of ECONYL® – A strong lightweight nylon fabric made from nylon waste otherwise polluting the Earth.

Through the regeneration process the nylon comes out just as strong as brand new nylon. The 100% ECONYL® regenerated nylon 200 denier rip-stop also has a thermoplastic polyurethane coating on the interior and water-repellent coating on the exterior of the fabric. Top quality components, tested in factory and field, brings you worry-free performance at any time. Adaptable to exactly what you need, so can you be a smart and well prepared adventurer.

FJORD 60-C ECONYL®

Front and top expansion sections:

Our top and front expansion pockets allow you to transform the Fjord 60-C from a 44-litre Carry-On into a 52-litre adventure pack or into a 60-litre expedition mode.

Get access to more, faster

Our one-of-a-kind quick-access top pocket is more than it seems. It's expandable, water resistant and conveniently separate from the main body of the backpack.

What's a journey without comfort?

Packing heavier and going further means one thing: your backpack needs to be really comfortable. So NYA-EVO designed the FJORD 60-C with a torso height adjustment system and a removable waist belt to be just that.

NYA-EVO knows not every journey is the same. And a backpack should be able to adapt.

FJORD 60-C ECONYL®

FIT MORE IN, GO EVEN FURTHER (C IS FOR CARRY-ON)

One thing all filmmakers and photographers can attest to is that gear is heavy, expensive and bulky, not leaving much space for other essentials. Not only does their gear need to be on-hand, but bags need to be sturdy enough to withstand some pretty extreme situations. The FJORD C-60 balances these demands in a comfortable, adaptable CARRY-ON design.

The Fjord 60-C also features an updated main fabric made of ECONYL® – A strong lightweight fabric made from nylon waste otherwise polluting the Earth. Through the regeneration process the nylon comes out just as strong as brand new nylon. The 200 denier rip-stop regenerated nylon also has a thermoplastic polyurethane coating on the interior and water-repellent coating on the exterior of the fabric.

REMOVABLE CAMERA INSERTS (RCIs)

YOUR GEAR, HOW YOU WANT IT

The adaptable Removable Camera Insert (RCI) system is ultra-protective, customisable, and collapses flat when not in use. The exterior fabric is made with 100% recycled polyester 600 denier rip-stop on and 100% recycled polyester 150 denier rip-stop for the inner fabric. It comes in three sizes, small, medium and large.

RCIs are designed to fit seamlessly into the FJORD backpack lineup, essentially, one was made for the other. The last thing you should worry about while on an epic adventure is if your costly gear will make it safely.

RCI

Maximum efficiency

The benefit of having all three sizes is the freedom to customize and carry what you want when you want. When using one, the others can be left at home with the lid on to store your other gear. Every outing or assignment is different, be efficient and have the option to take exactly what you need.
